Outdoor

FREEDOM TURNS ON THE IMAGINATION.

The desire for freedom is the leitmotif of Barazza's Outdoor collection. The beautiful design teams up with the innovative features to give a truly unique experience. The collection has been designed to celebrate the feeling of independence in every one of us, offering us infinite possibilities to manage our time in new spaces. Far-reaching expanses of sun, sea and countryside become the backdrop for our most memorable moments, moments to be enjoyed without a care in the world, thanks to the hard-wearing AISI 316 stainless steel, a material that is beautiful to look at and withstands even the harshest weather.

Mood Top mixer tap with remote control code 1RUBMDT

OUR DESIRE FOR ENDLESS NEW HORIZONS.

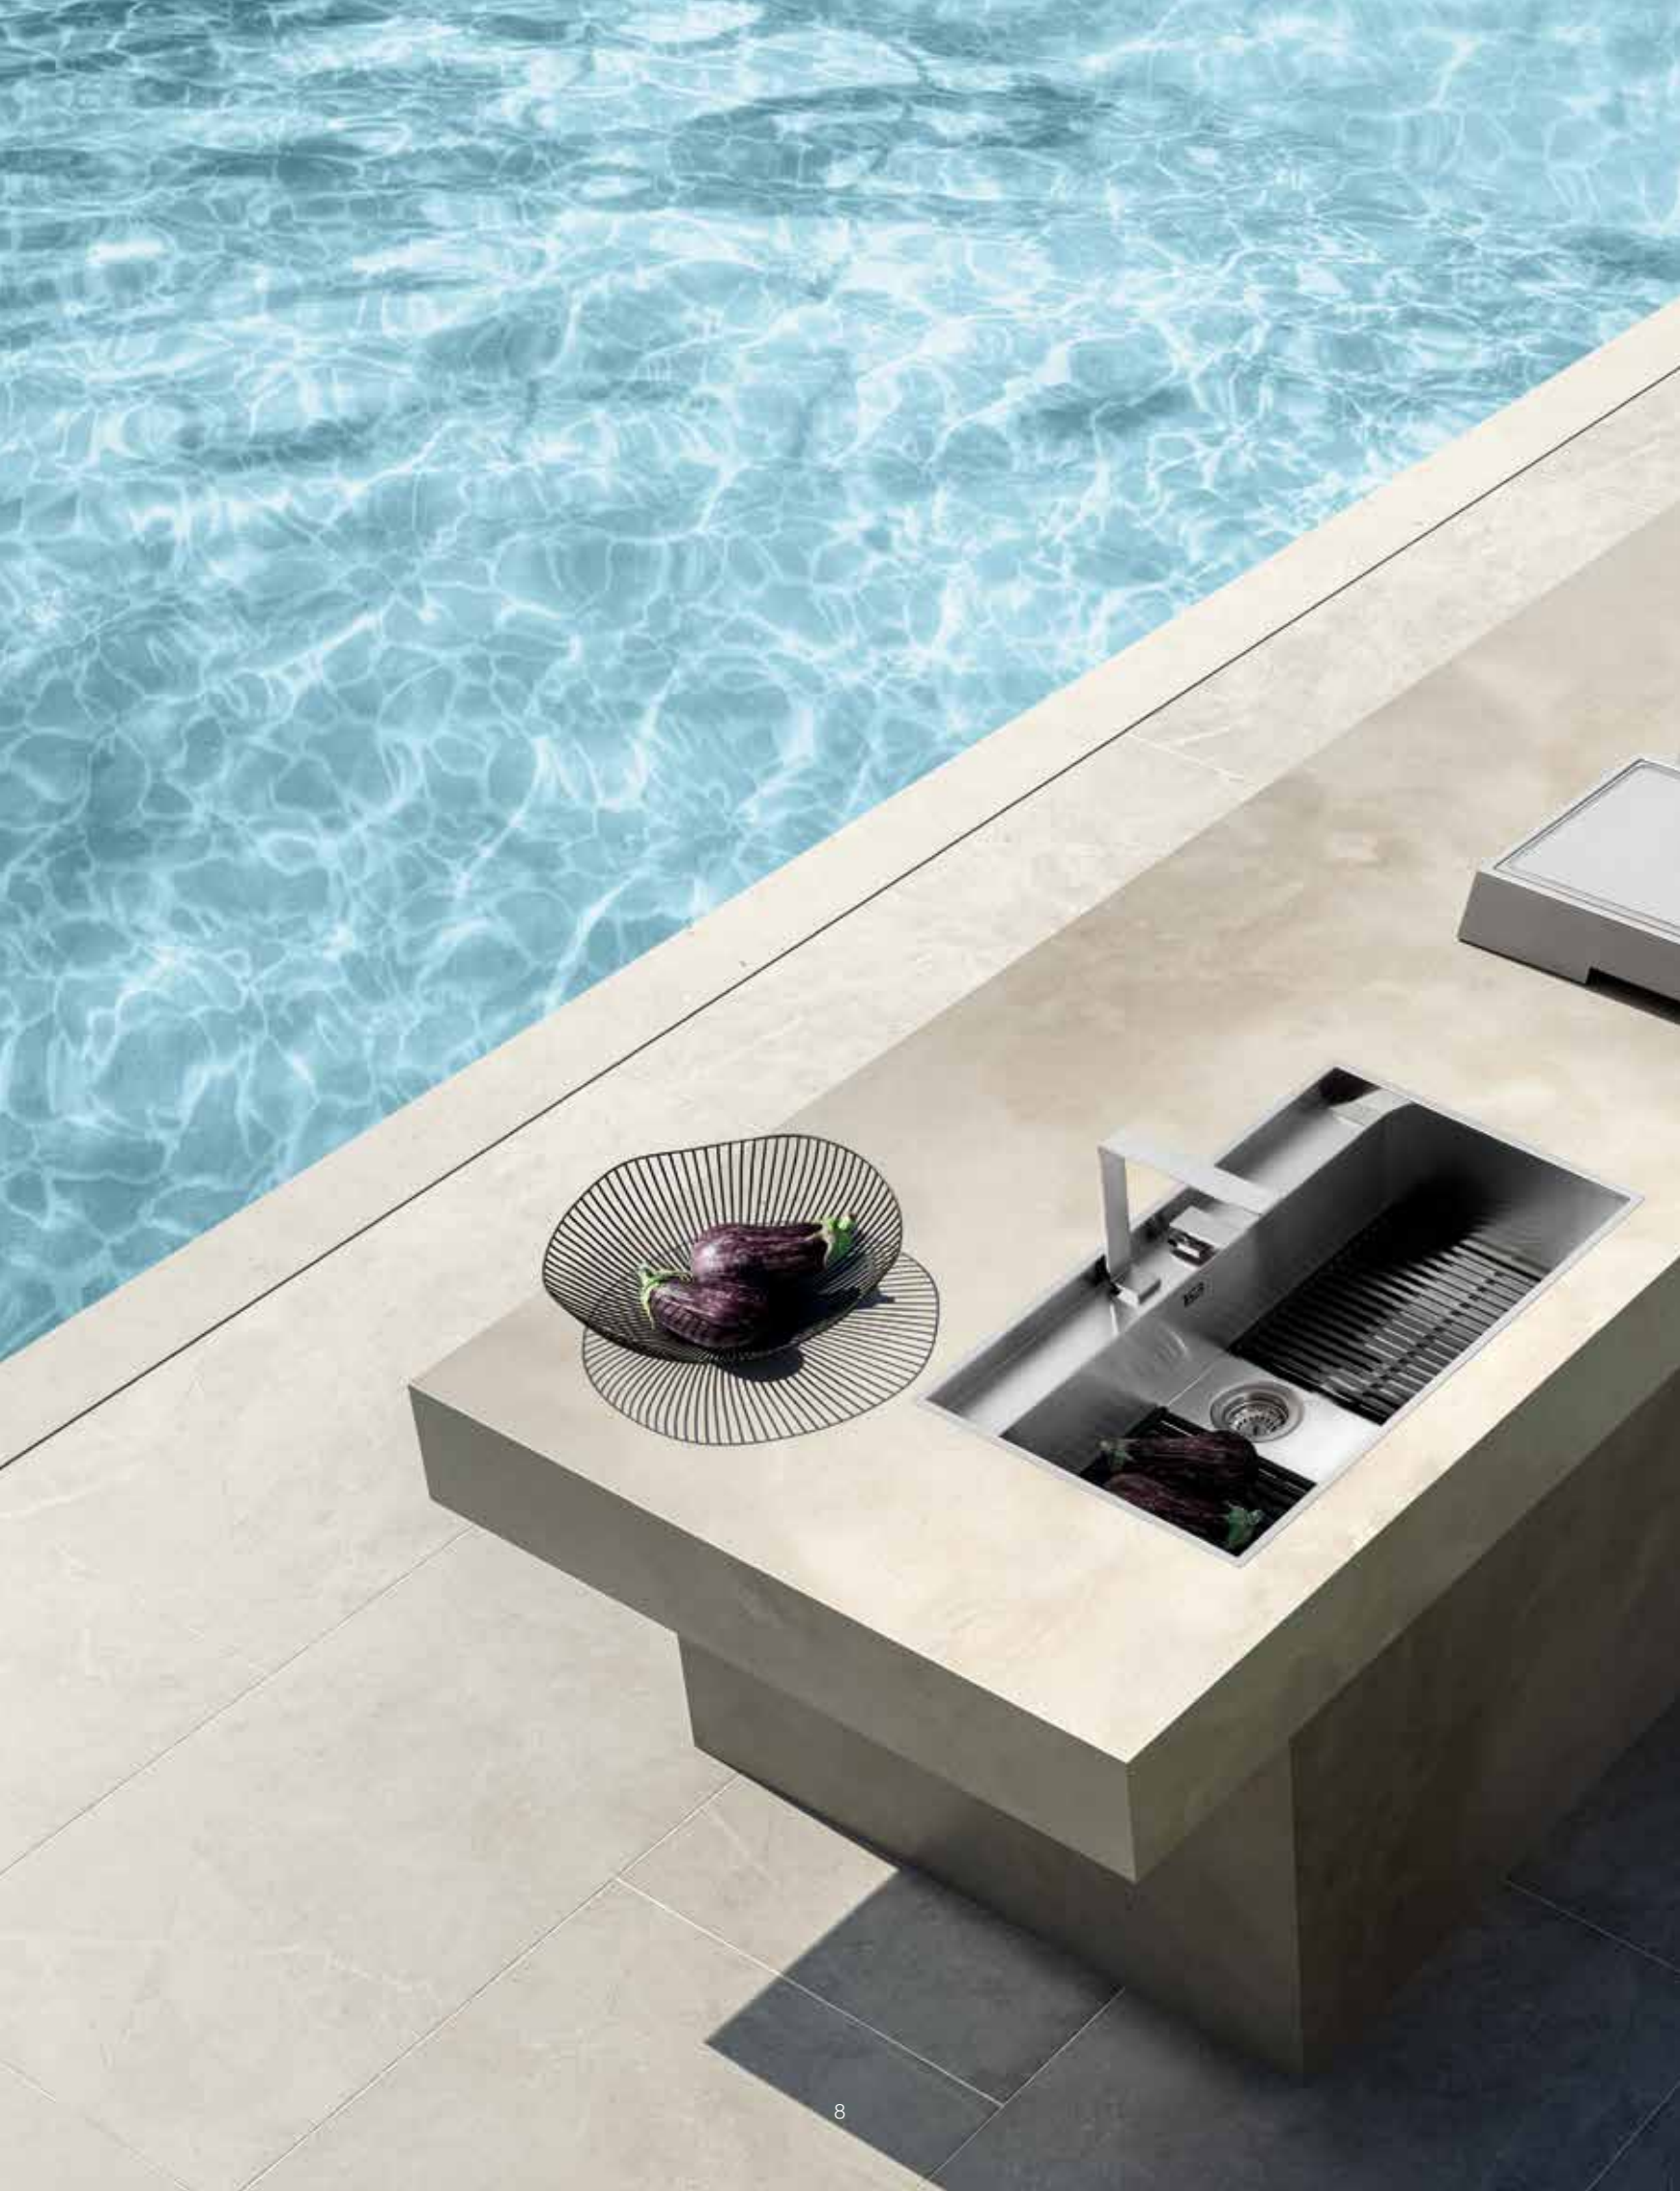

Nature is an incredible source of inspiration for our creativity and offers new entertaining opportunities, thanks to the Thalass hobs which take their name from Greek mythology and the goddess of the sea, the harbinger of fertility. The Thalass freestanding hobs are the focal point of the Outdoor collection; beautiful and resistant to the elements and the salty sea air, they can be positioned wherever you want, so you can try out your culinary skills using your favourite cooking techniques.

AISI 316 stainless steel, a hard-wearing and versatile material, is also used for the Lab 316 sink with lowering, built-in or undermounted. And to add to its versatility and practicality there is a new accessory, a sink grid in HPL that sits on the bottom of the bowl and provides a handy surface to wash vegetables on and protect the bottom of the sink.

THE ESSENTIAL IS NOW VISIBLE.

The feeling of newfound freedom that the Outdoor collection conveys is captured in the practical multi-purpose Cover for the Thalys hobs. This accessory has three uses: it is a handy tray to carry food from the hob to the table, it protects the hobs when they are not being used and gives the space a cleaner aesthetic. This minimalism is further enhanced by the Lab Cover 316 sink with the Thalys telescopic mixer tap which vanishes under its practical cover.

40 cm Thalys freestanding barbecue hob code 1PTFBQ
40 cm Thalys freestanding teppanyaki hob code 1PTFTK
Thalys multipurpose cover code 1C306
57x51 cm Lab Cover 316 sink with Thalys telescopic mixer tap
with remote control code 1LLB606

The new Thalys telescopic mixer tap in AISI 316 stainless steel with remote control adds the perfect finishing touch to the Lab Cover 316 sink. Once it has been lowered, it can be housed under the cover to optimise space and leave the work surface uncluttered. The special B-shaped overflow is an exclusive detail found on all the AISI 316 stainless steel sinks and bowls in the Outdoor collection.

A NEW DIMENSION IN TIME AND SPACE.

There's more than one place where we feel really at home. The Thalys freestanding hobs offer endless possibilities for relaxing and connecting with family and friends.

Any place can become your new entertaining space because they are so easy to move and position wherever you want.

40 cm Thalys freestanding induction hob code 1PTFID
40 cm Thalys freestanding barbecue hob code 1PTFBQ
40 cm Thalys freestanding teppanyaki hob code 1PTFTK
2x Thalys multipurpose cover code 1C306

Even if they are not needed to protect the hobs from the elements, the multi-purpose Covers provide a handy surface to place things on and give the room a completely essential look.

**NOT ONLY PRACTICAL,
A STUDY IN BEAUTY.**

Even if you don't need to move your Thalass work surfaces from one area to another, you'll still love their compact design and outstanding resistance to the elements. The built-in version has the same features as the freestanding one and gives the worktop a great aesthetic appeal.

70x40 cm R. "12" 316 square bowl code 1QR706
Officina Shower 316 mixer tap code 1RUBOF316
Black HPL chopping board code 1TOF26N
Thalas multipurpose cover code 1C306
Thalas solid oak wood chopping board code 1TTH
37 cm Thalas built-in induction hob code 1PTIID
37 cm Thalas built-in teppanyaki hob code 1PTITK

The secret of a winning team is its members: the chopping board in solid oak provides an interesting textural contrast with the steel and is an exceptional, compact and very hard-wearing accessory. It fits perfectly into the inside of the Cover when it is used as a tray.

A NEW EVOLUTION OF THE SPECIES.

The elements in the Outdoor collection can be installed as built-in into custom worktops in AISI 316 stainless steel, exceeding even the most ambitious visions and taking style to the next level. Now is the time to indulge in your own truly unique and incredibly personal aesthetic.

270x80 cm AISI 316 stainless steel island with satin finish with 3 cm edge.
27 cm AISI 316 stainless steel upstand, customized doors, front coverings for drawers and shelves with satin finish. 50x40 cm R. "12" 316 welded square bowl.
Kit Top mixer tap with remote control and pull-out spray head code 1RUBMRKT.
37 cm Thalass teppanyaki hob installed built-in.
37 cm Thalass barbecue hob installed built-in.
37 cm Thalass gas hob with 4,7 kW burner installed built-in.
Thalass multipurpose cover code 1C306.

A figure emerges from the shadows: the hobs in the built-in version have a 3 cm raised edge around them, creating interesting geometrical contrasts with the worktop. The stainless steel used for the worktops, fronts, drawers, sides, shelves, sinks and integrated welded bowls can have a satin or Vintage finish, further enhancing the unique features of the Thalys hobs.

BEAUTY AND FUNCTION.

The sleek lines of the square sink with radius "12" and the practical Kit Top mixer tap with remote control and pull-out spray head complete the functional work surface, the perfect balance between design and practicality.

THALAS FREESTANDING HOBS

The Outdoor collection is a complete range of Thalass freestanding hobs which are easy to move and position and are suitable for different cooking and prepping techniques. The special chemical composition of the AISI 316 stainless steel used for the hobs gives them extra protection against corrosion caused by the salty sea air, so they can be used in any environment. The practical multi-purpose Cover adds the perfect finishing touch.

FREESTANDING AND BUILT-IN THALAS HOBS

Double ring 4.7 kW

A burner that guarantees high performance thanks to its high power. For greater precision, there are two knobs to control the 0.8 kW internal flame and the 3.9 kW external flame. Also suitable for cooking with a wok.

Chef double ring 3.5 kW

Thalas hobs with 2 gas burners are equipped with Chef double ring 3.5 kW that guarantees professional results, thanks to two flame rings that evenly distribute heat to the base of cooking instrument. The flame is directed so that it is concentrated on the centre of the burner, making cooking even more rapid.

Induction

Heat is only generated on the bottom of the pan and is transmitted directly to the food being cooked. At 90% efficiency, cooking times are shorter. The surface remains cool for greater safety and to make cleaning easier.

Barbecue

This electric barbecue made of lava stone absorbs fat and stops smoke from forming. The heating element is located under the grill to avoid contact with cooking liquids which could otherwise generate smoke. The quality of the cooking is just the same as with a traditional barbecue.

T Teppanyaki

AISI 304 stainless steel electric hotplate measuring 6 mm thick for cooking meat, fish and vegetables without adding seasoning. It is divided into two cooking zones that can be used individually or together, without mixing the flavours of the different dishes. It has a thermostat and is easy to clean. Use a small amount of sparkling water with washing-up liquid and a steel brush to clean.

Multi-purpose cover

The Thalas multi-purpose cover protects the hobs from the elements, acts as a cover and surface to place items on and can also be used as a tray to carry and serve food at the table. The solid oak wood chopping board is an excellent accessory and completes its functionality.

OUTDOOR MADE TO MEASURE

Barazza outdoor products in AISI 316 stainless steel can be integrated into exclusive custom-made worktops in stainless steel with satin or Vintage finish, for unique tailoring solutions that can be customized at will.

Guidelines for outdoor Made to Measure worktops:

Finishes

The worktops in AISI 316 stainless steel are available in the refined and elegant satin finish or in the Vintage finish, in which the material comes to life thanks to a particular manual surface processing that makes each piece unique and unrepeatable.

Dimensional limits

All worktops are customizable in length, depth and thickness. The maximum sheet size for AISI 316 stainless steel worktops with satin and Vintage finish is 4200x1250 mm. Theoretical development is calculated like this:
worktop length / depth + 2x thickness + lower folds.

Worktop depth

Wall worktops are available with a depth between 300 and 750 mm, Island worktops are available with a depth between 751 and 1200 mm; if the worktop depth exceeds 1000 mm, only 6, 8 or 12 mm thick edges can be used.

Available edge thicknesses

6 - 8 - 12 - 20 - 30 - 40 - 60 mm

Worktop reinforcement panels

All the worktops are equipped with an internal aluminum support that gives greater strength to the product and better resistance to external agents.

Joints

If a worktop has dimensions that exceed the indicated dimensional limits, it is possible to combine two or more worktops at 45° or 90°, in an "L" shape or in line. Worktops with 40 and 60 mm thickness will be equipped with a junction system.

Cooking

On the AISI 316 stainless steel worktops it is possible to install, exclusively built-in, all the Thalys hobs (in satin finish).

Washing

On the AISI 316 stainless steel worktops it is possible to weld the R. "0" sinks with lowering, the R. "0" sinks with cover and the R. "12" square bowls, either in satin or Vintage finish.

Other workings

In AISI 316 stainless steel it is also possible to make splash backs, upstands, sides, doors and shelves.

WARRANTY

Barazza appliances comply with EEC directives and are guaranteed in Italy for 2 years.

CERTIFICATIONS

In addition to the UNI EN ISO 9001 certification, which guarantees quality control and optimisation of production processes, and has customer satisfaction as its primary objective, Barazza also complies with UNI EN ISO 14001. The aim is to maintain and improve its environmental system. This includes managing the impact of its activities in an effective and eco-sustainable manner, optimising natural resources, as well as energy resources, and implementing regular control systems for waste disposal and preventing environmental pollution.

GENERAL NOTES

Barazza reserves the right to make any changes it deems necessary to improve its products at any time and without prior warning. The colours shown are by way of example only. Full or partial reproduction of this catalogue for commercial purposes, without specific authorisation from Barazza, is strictly forbidden.
